Dear Ma'am,

I hope this message finds you well.

I am writing on behalf of the **AirSense Pakistan** team to formally present our Campus Pilot Deployment Proposal for your kind review and approval.

Project Overview

AirSense Pakistan is an AI powered **PM2.5 air quality prediction** and operational risk intelligence platform developed by students of Beaconhouse International College, Islamabad.

The Proposal

We are requesting approval to install one **IoT air quality sensor unit** on the campus rooftop for a period of **three months**. This data will be used to:

- **Train and validate** our predictive models under authentic Islamabad and Karachi environmental conditions.
- **Establish our campus** as the first proving ground for AirSense prior to its wider commercial launch.

Institutional Value & Deliverables

In return for your support, the university will gain:

- **Live Research Deployment:** A functional AI and IoT research setup hosted directly on campus.
- **Hyperlocal Data:** Exclusive access to real-time air quality data and forecasts for internal university use and future projects.
- **Institutional Recognition:** Strategic visibility as the primary launch partner for a high-impact, student-led innovation.

Resource Request & Cost Breakdown

To execute this 3-month pilot, we respectfully request the following support:

Requirement / Item	Description	Cost / Allocation
Hardware Procurement	Components for 1 IoT air quality sensor unit	PKR 20,000 (<i>one-time</i>)
Rooftop Access	Permission to install sensor on campus rooftop	3 Months
Network Access	Access to campus Wi-Fi at installation site	Existing Infrastructure
Total Budget Requested	One-time procurement cost	PKR 20,000

Supporting Documentation

Attached to this email, please find three documents detailing our plan:

1. **Campus Pilot Proposal:** Covers objectives, deployment plan, 3 month timeline, and the official budget request.
2. **Vendor Pricing Report & Budget Appendix:** Itemized procurement details and local vendor sourcing guidance.

We would be grateful for the opportunity to present this proposal at your earliest convenience, or to answer any questions you may have over email.

We are confident this pilot will reflect positively on the institution and provide genuine academic and research value across both the Business and CSSE/AI departments.

Thank you sincerely for your time and consideration.

Regards,

Muhammad Munim Qureshi
