Dear Ma'am Saba and Ms. Sanam,

I am writing on behalf of the AirSense team to share an exciting update and express our heartfelt gratitude for your incredible encouragement and support in bringing this vision to life.

What started as a student initiative at the Islamabad campus has grown into a truly inspiring collaboration with our talented peers in Karachi. We are especially grateful to Ms. Sanam and the Karachi campus leadership for placing your trust in this project and approving the budget for the Karachi rollout. We also want to thank Ma'am Saba and our Islamabad leadership for your constant guidance and backing in helping us coordinate and lead this cross-campus effort.

Seeing leadership from both campuses support student-led innovation so enthusiastically means a lot to all of us. It has given our team immense motivation as we work together to build something meaningful for both ourselves and BIC.

On that note, we are happy to share that Phase 1 is now officially underway, and we have already begun the hardware procurement process for deployment. We will keep both campus management and our supervisors updated as we hit key milestones along the way.

Thank you once again for your belief in us and for creating an environment where collaborative ideas can thrive.

Regards,

Muhammad Munim Qureshi

Student, BSc Artificial Intelligence

School of Computer Science and Electronic Engineering
